Brown Mechanical Contractors, Inc. is strongly committed to quality construction and a safe working environment. Brown Mechanical currently serves the construction industry in the institutional, commercial, industrial and government sectors. Not only do we assist our General Contractors in hard bid and negotiated work, but we also provide Design/Build services.

The company was recently ranked one of Alabama's top Mechanical Contractors by the American Institute of Architects. Business Alabama consistently ranks Brown as one of Alabama's top subcontractors. Brown Mechanical has earned achievement awards from NASA and The Corps of Engineers, in addition to numerous commendations from general contractors.

Brown Mechanical Contractors, Inc. has continuing success completing a diverse range of projects.

In healthcare, the company's projects include plumbing, medical gas, fuel oil, and HVAC systems at The Kirklin Clinic, The Children's Hospital of Alabama, UAB Hospitals, Baptist Montclair, Baptist Princeton, Coosa Valley Hospital, Russell Hospital, Brookwood Hospital, and Medical Center East.

Brown's office and financial projects include administration/operation center mechanical systems for AmSouth, Compass, Southtrust Tower, BellSouth, Alfa, Aflac, and Southern Progress. Some of Brown's major design/ build office buildings are Concord Center, One Federal Place, Crescent Bldg. (Brice Bldg. Co.), and Brasfield & Gorrie.

Brown Mechanical has also had the unique opportunity to design and/or install a wide range of water features and specialty projects, some of which include fountains at The Summit; The Colonnade; McWane Center; The Birmingham Museum of Art; Visionland; and the Otter/Beaver Exhibit at the Birmingham Zoo.

Brown's work in the defense and space industry encompasses over fifty projects at the Marshall Space Flight Center. In addition, Brown Mechanical has had enduring success completing sophisticated industrial projects for Alabama Power, Daimler-Chrysler/ Siemens VDO, Honeywell, General Motors, Toyota and U.S. Steel.

The company continues to successfully complete intricate site utility work such as fire and domestic water, sanitary and storm sewers, natural gas, chilled and hot water, steam, high-pressure air, hydrogen, and nitrogen.

With the help of in-house registered professional engineers, close relationships with local consulting engineers, a strong group of suppliers, and experienced staff, Brown strives to maintain its history of customer satisfaction, completing many complex projects throughout Alabama and parts of the Southeast. Brown Mechanical is proud of its many long-term relationships which continue to generate repeat business.
